brainLight® relaxTower,
 XL relaxTower or
brainLight® Touch Synchro complete,
 Touch Synchro XL complete

Already prior to the official product launch, we submitted our new Complete System, the **brainLight®** relaxTower *Zenesse*, to the critical examination of the PLUS X Award jury. The system successfully passed the test and scored in the categories Innovation, High Quality, Design, Functionality, and Ergonomics. As a result, the expert panel awarded the **brainLight®** relaxTower *Zenesse* with the prestigious PLUS X Award for "Relaxation System of the Year" and "Best Product of the Year 2016/2017".

Zenesse – the Path to Your Self!

Our conception of the **brainLight®-4D-Shiatsu Massage Chair *Zenesse*** has been inspired by Eastern philosophy. We have created an elegant interplay of contrasts — yin and yang, soft and strong — that is crucial for harmonizing body, mind, and soul.

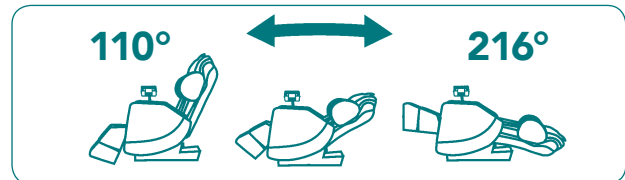

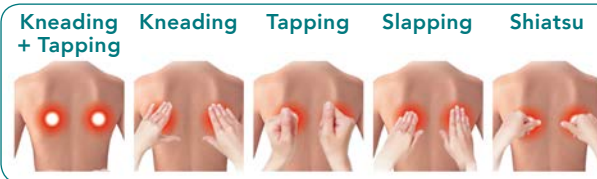

Zenesse cradles and touches you delicately, but can also give you a strong massage, stretch, and strengthen you — whatever you need to reconnect to yourself. Thanks to an intelligent body sensor, the massage chair adjusts its movements not only vertically, horizontally, and in its massage depth to your body, but also detects your individual back contours — that is what we call "4D" technology. The massage techniques are modeled on both Swedish Massage Therapy and Japanese Shiatsu and work along your acupressure points in order to stimulate the flowing of your "Qi" energy. The latter concept in turn is based on the meridian theory of Traditional Chinese Medicine (TCM). Indulge yourself.

The **brainLight®-4D-Shiatsu Massage Chair *Zenesse*** can be upgraded to a **brainLight®** Complete System by integrating it with the **brainLight®** relaxTower or the **brainLight®** Touch Synchro complete, creating a holistic relaxation experience for body and mind.

Our Complete Systems help you discover how to relax physically and mentally, how to unlock your innate potential, and how to achieve more with less energy.

FUNCTIONS

- **State-of-the-art 4D massage technology:** body sensor for detecting your individual back and neck length as well as depth, the shoulder width and back contours; the massage is automatically adjusted to the measurements taken
- **Acupressure point detection system**
- **Massage rolls can be positioned precisely**
- **Air pressure massage** in 3 intensity settings for the following areas, selectable individually or in combination: arm/hand, thighs, upper arms/shoulders, foot/calf
- **Positioning of the air pressure massage cushions** for the upper arm/shoulder area adjustable in 5 steps
- **5 types of back massage:** Kneading, Tapping, Slapping, Kneading + Tapping, Shiatsu
- **Up to 6 speed settings and 12 3D intensity settings of the back massage** can be selected manually
- **Foot sole massage:** automatic sequences I and II, or manually adjustable
- **Seat swing function** with 2 speed settings for releasing tension in the hip/pelvis area
- **Infrared heating function** in the back area, can be turned on/off individually
- **Sitting/lying positions can be adjusted manually;** separate adjustment of backrest, seat angle and footrest possible
- **4 automatic recline positions:**
 - Floating 1:** lightly reclined chair position that facilitates a sensation of floating
 - Floating 2:** further reclined chair position that facilitates a sensation of floating
 - Heart Balance Position:** chair position that particularly relieves the spine and supports circulation
 - Inversion:** chair position that stimulates the activity and oxygen supply of the brain
- **Emergency stop button:** the massage can be terminated immediately and easily from any chair position
- **Timer function**
- **Automatic switch-off.**

Air pressure massage for various areas, selectable individually or in combination

NEW: Emergency stop button – the massage can be terminated immediately and easily from any chair position

NEW: The air cushions for the upper arm/shoulder massage are adjustable in five steps. Depending on their position, the shoulders or the upper arms are massaged, attuned to your height.

Experience this unique dimension of relaxation for yourself!

brainLight®-4D-Shiatsu Massage Chair *Zenese*

What the **brainLight**®-Systems do for you

I. IMMEDIATE EFFECTS:

- immediate stress reduction
- deep relaxation after approx. 5 to 10 minutes
- replacement for approx. 2 hours of sleep (deep regeneration)
- access to the right brain hemisphere and thus to the subconscious
- aids long-term memory

II. SHORT-TERM EFFECTS AFTER APPROX. 5 SESSIONS:

- more peace and serenity in daily life
- increased resistance to stress
- better achievements
- increased mental clarity and decision-making skills
- personal wellbeing for body and mind
- activation of self-healing powers

III. LONG-TERM EFFECTS WITH REGULAR USE:

- better concentration
- enhanced memory and learning performance
- heightened reflexes
- lasting resistance to stress
- positive approach to the daily challenges of life
- continued increase of performance in many areas of life
- meditation experiences
- shaping the future from a place of inner knowledge and inner strength
- increased sensory perception.
